## Summary

---

Computer Science undergraduate with strong foundations in data structures and system design. Experienced in building scalable backend systems and distributed applications using AWS, Docker, and Kafka. Passionate about solving real-world problems with efficient and reliable software engineering practices.

## Education

---

- B.Tech in Computer Science Engineering** 2023 – 2027  
*Aditya College of Engineering and Technology* CGPA: 8.5

## Experience

---

- AWS DevOps Intern** May 2025 – Jun 2025  
*Technical Hub Pvt Ltd.*
  - Automated provisioning of AWS infrastructure using Terraform and AWS CLI, improving deployment consistency.
  - Built containerized environments using Docker and explored Kubernetes fundamentals.
  - Implemented IAM-based access control and improved system-level debugging practices.

## Projects

---

- Serverless Image Processing Pipeline** 2026  
*AWS Lambda, SQS, Python*
  - Designed an event-driven system to process images asynchronously, improving scalability and fault tolerance.
  - Implemented queue-based architecture using SQS to handle concurrent workloads.
- Multi-Region Backend System** 2026  
*NGINX, PostgreSQL, Kafka*
  - Built a distributed backend supporting multi-region deployment with load balancing and failover handling.
  - Used Kafka for asynchronous communication, improving system resilience and throughput.
- High-Volume Data Export Engine** 2026  
*Python*
  - Developed a system to process and export 10M+ records efficiently using streaming techniques.
  - Optimized memory usage and improved performance for large-scale data processing.
- Asynchronous Payment Gateway** 2026  
*Python, Webhooks*
  - Built an async payment system with webhook-based event handling.
  - Implemented retry logic and failure handling to ensure reliable transactions.

## Technical Skills

---

- **Programming:** Python, Java, C++
- **Core CS:** Data Structures, Algorithms, Operating Systems, DBMS
- **Backend & Systems:** Distributed Systems, REST APIs, Event-Driven Architecture
- **Cloud & Tools:** AWS (EC2, S3, Lambda, SQS), Docker, Kafka, Git, Linux
- **Web:** HTML, CSS

## Certifications

---

- AWS Certified Developer – Associate
- Google Cloud Engineering Certificate
- IT Specialist – HTML & CSS (Certiport)
